ATTORNEY'S DO ET 062986.0174 (15-4-1019.00)

19

WHAT IS CLAIMED IS:

x1 > 4.

- An integrated circuit, comprising:
- a\central processing unit;
- an instruction cache in communication with the central processing unit;
- a data cache in communication with the central processing unit;
- a trace recorder operable to capture selective information passed from the central processing unit to the instruction cache and the data cache.
- 2. The integrated circuit of Claim 1, wherein the trace recorder is operable to capture information pursuant to a triggering event.
- 3. The integrated circuit of Claim 2, wherein the trace recorder is operable to maintain captured information prior to and associated with the triggering event.
- 4. The integrated circuit of Claim 2, wherein the trace recorder is operable to capture information subsequent to and associated with the triggering event.
- 5. the integrated circuit of Claim 2, wherein the trace recorder is operable to capture information associated with the triggering event prior to and subsequent to the triggering event.
- 6. The integrated circuit of Claim 1, wherein the trace recorder is operable to inhibit capturing of information.

ATTORNEY'S D ET 062986.0174 (15-4-1019.00)

20

The integrated circuit of Claim 1, wherein the trace recorder is operable to provide captured information to a device external to the integrated circuit.

- 8. The integrated circuit of Claim 1, wherein the trace recorder is operable to store captured data in non-consecutive storage locations.
- 9. The integrated circuit of Claim 1, wherein the trace recorder is operable to capture data every Nth operating cycle of the central processing unit.
- 10. The integrated circuit of Claim 1, wherein the trace recorder is operable to maintain captured information associated with a first trigger event despite the occurrence of a second trigger event.

ATTORNEY'S DET 062986.0174 (15-4-1019.00)

21

1). A method of recording trace data in a microprocessor based integrated circuit, comprising:

identifying a triggering event;

capturing information transferred from a central processing unit to an associated instruction cache pertaining to the triggering event;

capturing information transferred from a central processing unit to a data cache pertaining to the triggering event.

- 12. The method of Claim 11, wherein information pertaining to a triggering event is captured prior to the triggering event.
- 13. The method of Claim 11, wherein information is captured in non-consecutive storage locations.
 - 14. The method of Claim 11, further comprising: outputting captured information.
- 15. The method of Claim 11, wherein information is captured for every Nth cycle associated with the operation of the central processing unit.

ATTORNEY'S DET 062986.0174 (15-4-1019.00)

PubA!

16. A trace recorder for a microprocessor based integrated circuit, comprising:

22

- a memory array operable to capture information passed from a central processing unit to instruction and data caches of the integrated circuit;
- a trigger control register operable to initiate information dapture;
- a capture control register operable to determine how information is to be captured and maintained;

an order map register operable to determine where information is to be captured within the memory array.

17. The trace recorder of Claim 16, further comprising:

an inhibit mask register operable to selectively inhibit capturing of information.

18. The trace recorder of Claim 16, further comprising:

controller logic operable to access the memory array according to the trigger control register, the capture control register, and the order map register.

- 19. The trace recorder of Claim 18, wherein the controller logic generates memory addresses to the memory array.
- 20. The trace recorder of Claim 16, wherein information is captured prior to and subsequent to a triggering event.
